Carnegie Library 4th & Nev

THE RICHMOND TERMINAL WAS ESTABLISHED IN 1903, AND IS THE LEGAL COUNTY AND CITY NEWSPAPER. RICHMOND'S NEWS SUMMARIZED

The Terminal Boosts and Advertises Richmond, directly increasing property values.

THE RICHMOND TERMINAL

Richmond's oldest newspaper; has the confidence and support of pioneers.

VOL. XXIII. RICHMOND, CALIFORNIA, FRIDAY, OCTOBER 8, 1926 No. 41

Waterfront Property Valuable to Richmond

City Is Safeguarding Proposed Lease to Parr

The city council held a 7-hour extra session Tuesday to consider the proposed lease of the city's harbor lands to the Parr Terminal corporation of Oakland.

After much deliberation and raising of technical points, it was decided to reconsider or revoke the previous lease form and substitute a new one.

The council will go over the new amended lease at next Monday night's meeting. The amended lease will provide for streets and street railway transportion, etc., in the inner harbor district.

Plumbing Inspector Makes Report

Seventy plumbing inspections were made during the month of September according to the report of plumbing inspector. Three houses were inspected for plumbing and the plumbing in two of them condemned.

Sixty-three sewer inspections were made during the month. Plumbing permits for the month amounted to 37 of which 33 were for new work and 4 for old work.

East Richmond Asks For Street Paving

Bids for the paving of portions of McLaughlin, Ventura, Humboldt and Lassen streets and Garvin avenue in the East Richmond district east of San Pablo avenue will be opened Oct. 18, it was announced at Monday night's meeting of the city council. No protests were heard. Asphalt paving is planned for the streets.

San Jose Ready to Vote More Bonds

San, Jose, Oct.7.—An ordinance fixing Nov. 2 as the date for voting on bonds for a million dollar auditorium and other civic improvements was passed by the city council Monday night. Alum Rock park water supply is included in the improvements.

Comparative Bonding Figures

The municipal bond sales for Iowa in 1825 were, county bonds $$4,676,426; school district bonds $4,797,600; county, town and village bonds $3,343,287; a total of $12,817,313.

The municipal bond sales for California in 1925 were, state bonds $4,000,000; county bonds $13,013,500; school district bonds $24,795,750; city, town and village bonds $63,816,908; a grand total of $105,626,158, or eight times the bonded indebtedness of the Hawkeye state.

Pour Concrete on Garrard

Work on the pouring of concrete on the east side of Garrard avenue by the Califronia construction company is completed. The west side of the roadway is being graded and rolled preparatory to laying the concrete.

The recent rains instead of causing harm to the work have benefited the job. The California Construction company is rushing the contract to completion.

President Pays Tribute to Lovely-Gracious Woman

Washington, Oct. 7.—One of the most striking tributes was printed in the Milwaukee, Wisconsin, Journal. It runs as follows:

Today The Journal prints an interview with the President of the United States. It contains not a word of government policy, not a syllable of party propaganda, not a letter of self promotion. Yet that interview will live when Coolidge policies are forgotten. In it a man comes from behind a mask Readers of that interview will know Calvin Coolidge as they never could hope to know Mr. President.

"A man who has the companionship of a lovely and gracious woman enjoys the supreme blessing that life can give. And no citizen of the United States knows the truth of that statement better than I."

In these words Calvin Coolidge pays tribute to woman's aid in man's labors. But he does more. He shows that, beneath a frigid exterior, there beats a heart more warm than even his friends suspected.

Mr. Coolidge believes in the family as he believes in God, wholeheartedly. He believes that today opportunities are greater than ever before for men who are helped by family ties. And, in a moment of rare revelation, sitting with a friend, he said so. A laughing world, hushed at the glimpse of a soul, will be the better for it.

County Clerk Gets Election Literature

Martinez, Oct. 7.—County Clerk J. H. Wells received from the secretary of state two and one-half tons of election literature to be used by the county for the November election. The literature comprises booklets on the amendments and initiative measures to be voted upon.

Wells has an extra force working and expects to have all the circulars mailed before the end of next week.

CITY BRIEFS

Jos. F. Brooks, Standard Oil official, has been confined to his home in Mira Vista the past week with an attack of influenza.

• • •

Patrick Dean, former Pt. Richmond business man, was in town Tuesday.

• • •

I. N. Foss of San Joaquin valley was a Richmond visitor this week. He was accompanied by Mrs. Foss. They were former residents of this city, Mr. Foss being one of the original founders of the Daily Independent at Point Richmond.

• • •

Mrs. Ida Werner and son of 418 10th street have returned from an extended European tour, making Dresden, Germany, their principal stopping place where they visited relatives.

• • •

Mrs. A. C. Burdick, for the past two years president of the Richmond club, has resigned owing to illness in her family. Mrs. Carl Alexander, vice-president, succeeds Mrs. Burdick. Mrs. Ludwig has been chosen to succeed Mrs. Obenland as treasurer, the latter lady having resigned.

• • •

The Royal Neighbors are preparing to give a big whist party.

State Convention of Elks in Session at Santa Monica

Santa Monica, Oct. 5.—John J. Lermen, president of the California Elks association, in letters to the local committee, claims that much enthusiasm is being shown in the state convention by northern lodges. The convention will be held in Santa Monica on October 6, 7, 8 and 9, with probably one of the largest membership attendance in the history of the association.

San Francisco lodge has already chartered the S. S. Alexander to carry their large delegation to the convention.

Lodges in the northern part of the state will turn out large delegations, many of them bringing their bands and crack drill teams.

The following delegates are representing Richmond Lodge No. 1251 at the convention: Exalted Ruler James Stewart, John Regello, Peter Brown, James B. Ballantyne, Frank Tiler, Arthur Irwin, W. V. Phelps, Fred Canning, F. W. Morgan, H. D. Chapman, Grayson Pauly, W. P. Wetmore and James Malone.

Bakersfield lodge with its champion drill team will attend with nearly a full quota of its membership.

A large delegation of Richmond Elks will attend.

Low Bid on Pipe Line to Wharf

M. H. Timmons was awarded the contract for the building of a fresh water line to the inner wharf. Timmon's bid of $2516.81 was the low bid. Other bids presented included Spiersch Brothers, $2737; and J. J. Grearson, $3576.

American Allowed to Witness Strange Rites

Strange tales of native tribes that perform initiation rites forbidden to the eyes of women and eat a curious drug which they claim detaches the spirit from the body, are told by Dr. William Montgomery McGovern, who has just returned with the reputation of being the first explorer to emerge alive from the unmapped regions of the northwest Amazon basin, in South America. Two other explorers who succeeded in penetrating to this wild land failed to return, one dying from fever and the other being eaten by cannibals. Doctor McGovern succeeded in finding only the hat of the latter. He was allowed to witness the strange Jurupari, or harvest rites. Candidates, for a fortnight before, are deprived of food, eating only kaapi, a curious drug which they claim produces a semi-psychic state in which the spirit can leave the body and visit other tribes. Doctor McGovern tried the drug and had the feeling of being detached from his body, although he retained full control over his muscles. These ceremonies are forbidden to be seen by women, on the pain of death. Doctor McGovern was allowed to bring away one of the sacred trumpets used in the rites, only on the solemn oath that he would never let a woman see it.—Atlanta Constitution.

Titled English Jews

Jewish peers of England are the earl of Reading (recently made a marquis), Baron Rothschild and Baron Swythling. Sir Herbert Cohen leads a list of 20 baronets who are Jewish. This is followed by a list of 26 knights who are Jewish. Of the members of the government, the Right Hon. Montague, M. P. and Right Hon. Sir Alfred Mond, M. P., are prominent Jews. These names are followed by 11 other members of parliament belonging to this race. There are 30 Jews who have been awarded the Distinguished Service Award.

Worthy of His Hire

There are no public servants who deserve more generous compensation for services rendered the public than policemen and firemen. The hazard attached to their jobs should awaken those in power to action, and they should see that these men are paid living wages, and more, for risking their lives in the protection of life and property.

San Jose is one of the few cities that has decided to pay her policemen and firemen a living wage. The city council of San Jose has ordered her policemen and firemen paid the average of nine California cities of approximately San Jose's size. This arrangement of equalization is more than fair to the city, for it would be impossible under this plan to pay policeman or fireman the top scale paid in the group of nine cities.

Richmond policemen and firemen are underpaid. The chiefs of the fire and police departments should receive at least $350 per month, and no fireman or police officer should be paid less than $200 per month, the scale graded up from this minimum commensurate with length of service and hazard of duty.

It seems to be an old-fashioned custom to overlook the policemen and firemen in adjusting salaries. It is a mistaken idea that these men have easy going soft jobs and are well paid. Crippled firemen and policemen, the many widows and orphans stand as living testimony in favor of the fair wage which these men deserve and which they will receive if they press their demands.

Little Terminals

Slight attacks of Christmas nightmare are beginning to work on father.

• • •

Some men whistle because they are contented and happy, but the majority of them whistle to stimulate courage.

• • •

The little business men scrap among themselves, while the more pretentious and robust ones get together and cooperate.

• • •

The front yard may be litered with circulars, but the home newspaper is working overtime on the inside.

• • •

A lease covering a period of half a century is something that should be duly considered, figuring the present day speed we are hitting up.

• • •

The kind of literature that is needed today is on the style of Elbert Hubbard's "Message to Garcia." This little booklet would be a respectable substitute for the hip pocket flask now pompously carried by some of our youngsters.

Election Nov. 2, and where are all the candidates?

Pinwheel Auto Hub

Turning automobile hubs into Fourth of July pinwheels is the latest thing accomplished by the lighting experts. A four-candle-power electric light with a green lens at the side and alternate red and white glasses on the edge is attached to the hub of the left front wheel, says Popular Mechanics Magazine, the object being to avoid a sideswipe of an approaching car. The signal is sufficiently distinctive to indicate the extreme outside of the car to an oncoming driver, even though he may be slightly blinded by headlights. The lamp is said to be visible at 200 yards.

A small paste brush is a handy thing for applying kerosene to grease spots before laundering.

Briton Attributes U. S. Prosperity to Power and Initiative

Private initiative and the widespread use of mechanical power have brought about the present wonderful industrial prosperity of the United States. That is the conclusion of the British Electrical Review, leading industrial organ of Great Britain. Its own words are as follows:

"The high standard of living of all classes in the United States is evident to the most casual observer, and the recent delegation of British trade unions saw that the reason lay largely in the extensive use of machinery and labor saving devices and the initiative displayed in American business organization.

"The rapid advance of the light and power industry in the United States is the envy of every foreign country, and the benefit of such a development is found in the solution of labor problems. If human beings are made the controllers of power instead of the generators, their earning power is so much increased as to make it possible to pay them not only a living wage, but a cultural wage.

"Private initiative is at the foundation of America's prosperity to day and although there exist many government agencies to protect the public against abuses, this is quite a different thing from government ownership or subsidy."

Historical River to Furnish Power

Jordan river, the famous Biblical stream in which souls were reborn and spirits revived, is now to revive industry in the Holy Land. On its banks the Palestine Economic Corporation will build a hydro-electric station, the output of which will supplement the product of steam plants now operating in the ancient towns of Tel Aviv, Haifa and Tiberias. With increase of power supply new industrial plants are expected to be built along the lines, and eventually, say the backers of the Jordan development, Palestine will once more become an important factor in the trade of the Orient.

Humane Society Presents Report

The report of the Humane Society for the month of September was presented to the city council Monday night by Tsar Calfee, secretary. According to the report, there were 43 calls responded to of which 14 adults, 27 children and 121 animals. Seventeen animals were reported cruelly treated and five were humanely destroyed. The expenses for the month amounted to $50.

Daylight Burglar Visits Albany

(Albany Argus)

The small cottage in the rear of Joseph Beck's home at 818 Adams which is occupied by Mr. and Mrs. Nickel, was burglarized in broad daylight last Wednesday by a dark complexioned and well dressed prowler who was seen leaving the place, but who was thought to have been an acquaintance or visitor. Two watches and $9 in cash were stolen. Whether this comprised all of the thief's loot is not known. The Nickels were absent and were greatly surprised on returning to find their home ransacked. There has been no clew discovered so far, and is believed the gentleman burglar was one of the overflow from Berkeley or Oakland who was on his way.

Republican Control Benefits the Workers

Local Police Arrest 116 in September

Chief of Police Daniel Cox reported 116 arrests for September to the city council Monday night. Six warrants were served, six search warrants issued and four witnesses subpoenaed. Ten persons were reported lost and the same number were reported found. One person lost by outside departments was found and returned. There were 33 accidents of which 8 were automobile accidents and 23 collisions.

Property reported stolen amounted to $1003.25 and stolen property recovered totaled $346.50. Property recovered for outside departments amounted to $400.

Of the arrests, there were 23 misdemeanor complaints, involving the arrest of 101 males and 9 females and 8 felony complaints involving 6 males.

AT LARGE

"Is the man still living who originated the charleston?"

"Yes! I don't believe they've caught him yet.

Good Wages Based On Confidence in Government

Washington, D. C., October 7.—The republican party is entitled to approach the people this year claiming credit for the enunciation of the gospel of high wages. In a world which seemed intent at readjusting its economic differences at the expense of the workman, and which was seeking to balance its books by deductions from the pay envelope, the United States, under Republican control, has taken a firm stand that the way to improve conditions is not by decreasing but by increasing the wages of the producers. Europe is already beginning to see the weakness of its position and the wisdom of the program followed in the United States. Only a few days ago the British ambassador advised his listeners that the prosperity of America was largely based on the fact that we "have learned the gospel of high wages."

Within a few weeks a new parliamentary commission from Great Britain will arrive in the country which while already converted to the theory that American high wages had made for its prosperity, will seek to acquaint itself with the industrial adjustments, and, if possible, preach the same gospel over seas. All this is worthy of consideration at this time. Let us not forget that high wages are based first of all on confidence in the government, and that any movement which would transfer the control of the government from the republican to the Democratic organization would inevitably be reflected in loss of this confidence and a fall in wages.

Back of this Service

In the public utility business it is necessary to raise new capital for additional plant facilities.

Power plants, gas works are not built from earnings—that is, from money paid for service rendered.

New money must be obtained through the sale of securities such as stocks and bonds. Having a good credit rating has had much to do with the success of this Company in the sale of securities.

The Company initiated the customer ownership plan and was the first in the United States to put it into practice.

From School Teacher to Great Eminence

A young man who was brought up on a farm, qualified for district school teacher, then managed to save enough money to put him thru medical college.

Later, he moved to Buffalo, N. Y., and today the name of this man, Dr. R. V. Pierce, is known throughout the world. His Golden Medical Discovery is the best known blood medicine and tonic. More than fifty million bottles have been sold. If your dealer does not sell the Discovery, in liquid or tablets, you can obtain a pkg. of the tablets by sending 65c to the Dr. Pierce Clinic, in Buffalo, N. Y. Also write for free medical advice.

Educational Argument

In the rural districts of England, where children have always gone to work in the fields, compulsory education is looked upon with a good deal of disfavor. The Argonaut says that during an election a candidate for parliamentary honors was addressing a meeting of Yorkshire men when he was interrupted by a man who asked:

"Art in favor o' childer goin' t' school, till they be sixteen?"

"Certainly I am," said the speaker.

"Well, 'm not," was the emphatic answer. "I'm noone goin' to 'ave my lad coomin' whoam fro' t'school an' axin' me for money for a shave."—Youth's Companion.

Too great haste leads us to error.

Golden State
News of Interest to All

The salmon fishing season has closed. One Ukiah fisherman brought in a salmon that weighed 62 pounds.

The old town of Round Mountain, near Redding, known to early settlers as Buzzard Roost, was wiped out by fire recently.

Plans for the new Marysville union high school at Marysville, which is to be erected at a cost of $400,000, were accepted.

Formal opening of the new $750,000 clubhouse of the Pasadena Athletic and Country club at Pasadena, will take place October 19.

The 1927 conference of the California Methodist Episcopal churches will be held in Sacramento, the exact date to be determined later.

A market milk inspection department will be established March 1, 1927, at Merced, under a resolution adopted by the board of supervisors.

To date this season about 15,000,000 trout fry have been sent out from the Mount Shasta Hatchery, at Mt. Shasta to all parts of the state of California.

The new $50,000 Walnut Grove grammar school was dedicated with the grand officers of the Native Sons of the Golden West taking the leading part.

Arrangements have been completed for the three-day citrus extension school to be conducted at the Chaffey Junior College, Ontario, October 27 to 29.

Mrs. Elizabeth Amaden of western Yolo county has been selected new president of the county board of education, to succeed Mrs. Maud Edson whose term has expired.

Martinez is looking forward to a possible $200,000 bond election early in the spring to provide funds for the erection of new primary grade school buildings and kindergarten.

Abolition of the county board of school trustees, department of public welfare and county board of appraisers will go to the voters of Butte county on the November ballot.

Visalia chamber of commerce won sweepstakes for best feature display at the Tulare county fair at Tulare, the judges announced prior to the grand closing of the annual event.

Davis farm, State Argicultural College, will entertain 2,000 boys and girls from farm organizations in all parts of California at the annual club conference October 14, 15 and 16.

Evidencing the county's desire to officially promote agriculture through the medium of fairs, the supervisors of Tulare county, have authorized expenditure of $4,000 for fair purposes this year.

Vineyardists of the Pasadena-Sierra Madre district are finding a ready sale of fresh grape juice on the boulevards near their acreage, and many have set up grape presses to supply the demand.

Petitions are being circulated and freely signed in the Lincoln District of Placer county, asking the board of directors of the Nevada irrigation district at Grass Valley, to extend the boundaries of the district to include a large area of fruit and grain lands of that section.

More than $250,000 for expenditure in the extension and improvement to canals and the drainage system is provided for in the budget of the Merced irrigation district, adopted by the board of directors upon the recommendation of Chief Engineer A. Blakesley.

San Bernardino was chosen as 1927 convention city of the California State Federation of Labor, which just closed its convention at Oakland. The selection came as one of the closing acts in the final session and ended a spirited contest between San Bernardino and Sacramento for the honor of entertaining the labor delegates next year.

The Placer County Victory Highway memorial will be mounted on a huge granite boulder that towers at one side of the Placer county auto camp in the high Sierras. This was decided by residents of Placer county, representatives of the Sacramento chamber of commerce, the state highway commission and the Victory highway association.

The county authorities at Red Bluff, are investigating the killing of a steer, a colt and a calf which were found on the Davis place in Finlay Lake district on the Lyonsville road, thirty miles east of Red Bluff. The theory is advanced that they were shot by hunters, mistaking them for deer. The belief also is voiced that the shooting was wanton.

Plans have been completed for further improvement work of the Pacific Gas and Electric company system in Red Bluff. H. B. Heryford, manager of the west side division, says the company has authorized the expenditure of $13,000 to reconstruct and reroute the distribution lines and street light circuit lying west of the Southern Pacific tracks at Red Bluff.

Discovery of mealybug infestation on tombstones in Evergreen cemetery at Riverside, sent horticultural inspectors scurrying about among the gravestones to find just how far the citrus pest had gone in its peculiar invasion of the cities of the dead. According to E. C. Tuthill, county superintendent of rodent and pest control, who liberated a large number of ladybirds in the cemeteries to dispose of the mealybugs, this is the first time he has ever found the pests on stone surfaces. Usually found only on citrus trees, the mealybug also spreads to ornamentals.

While irrigating on his ranch about three miles northeast of Oakdale, Nelson Collins noticed the stream of water sinking into the ground. Thinking it was a squirrel hole, he went to fill it, but found that the water was running into an old abandoned well that had been covered with timbers and several feet of earth. For many years Collins had plowed and cultivated over the well and had driven his tractor over it many times. The well was eighty feet deep and it took two and a half days' work with a team to fill it.

Declaring that "character as well as roads" is being built at California's prison highway camps, Ben H. Milliken, state superintendent of the camps, announced that the net loss from escapes has been only twenty-six men since the wage system for convict workers on the roads was inaugurated three years ago. The average prison camp saving per man has been 29 cents a day, Milliken said. He added that 98 per cent of the prisoners discharged or paroled from the camps are making good.

The state of California was saved more than $1,000,000 last year in adjustment of 387 informal complaints and 842 applications for rate changes by the state railroad commission, it was shown in a summary of the commission's activities. Reduction in ferry rates on San Francisco Bay was estimated to have saved $750,000. The report points out that "utilities were treated with fairness, so that where rates were attacked in legal proceedings the commission's acts were uniformly sustained."

The Glenn county board of supervisors at a special session ordered the placing on the ballot at the November election of the proposition which will determine the fate of the University extension officers in Glenn county The Glenn county unit, federation of farmers, recently advocated the withdrawal of county support from the extension offices in order to bring about a reduction of taxes. The county board agreed to submit the matter to the citizens of the county.

A slight increase in the number of automobile registrations for August, 1926, compared with the same month of 1925, was reported by the state division of motor vehicles, the totals being respectively 22,422 and 21,367. A registration of 1,725,000 is expected next year, according to Will H. Marsh, chief of the department. The income of the department from all sources for August, 1926, totaled $182,622, as compared with $177,237 in August, 1924.

The new $1,000,000 building of the Bank of Italy, at Fresno, which is declared to be one of the most beautiful in the San Joaquin valley, was officially opened recently. The new structure forced the oldest bank in the valley to close its doors. Organized in 1881 as the Fresno County Bank with stock valued at $100,000, it became the First National Bank of Fresno on March 16, 1885, and was purchased by the Bank of Italy eight years ago.

The third annual Three Rivers apple festival will be held in this mountain community of Tulare county October 15, 16, and 17. Definite decision to hold the festival this year followed a recent meeting of the women of the community, who have sponsored the program. The apple orchards are loaded this year with an excellent quality of fruit and it is believed the festival will be more successful than either of those heretofore given.

In 1,148 classes throughout the school system of California the practical Americanization of thousands of foreignborn men and women is quietly being effected through the fundamentals of education in the English tongue, and the teachers of these classes, whose work is litle known by the general public, have increased the scope of adult immigrant education in California by more than 400 per cent in the last six years.

Water in the Sacramento river is at the lowest ebb in fifty years, says John D. Hubbard, engineer at the Phelan-Parrott pump station, Chico, who states that the water measures 109.08 feet above sea level, compared with 109.25 on August 18 of this year. The turning of water from the rice field in to the river has had but little effect in increasing the flow.

A monument and bronze plaque in honor of California's "mother orange tree" at Bidwell Bar, near Oroville, are to be erected at a ceremonial to be held by the Native Sons and Native Daughters of Butte county on November 27. The "mother tree' is said to be the first orange tree planted in the state.

One of the largest and most interesting buildings in the Yucaipa valley is that being erected on the Ocean-to-Ocean Highway between Redlands and Yucaipa City for the King Beverage company. It is a big cold-storage plant and the home of a cider-making concern.

The new $44,000 jail and hall of records for Del Norte county at Crescent City, is now completed and occupied.

Madera county farm bureau has won the third regional prize, a $100 sow, for the best percentage increase in membership.

Dedicated to the American Legion "in appreciation of the silent ones who made the supreme sacrifice, and the living ones who fought for God and country," the new Victory Fountain at Long Beach, occupies a prominent site at the intersection of Chestnut Place and "The Walk of a Thousand Lights."

Dedication of the new $500,000 Eureka Junior high school, at Eureka, Humboldt county, was conducted recently by members of the grand parlor, Native Sons of the Golden West, with the school officials of the municipality co-operating.

Farmer Owes Life to Obedient Team

Groveland, N. Y.—Hugh Curry, a farmer living on the west side of the Genesee flats, had a narrow escape from death when, with the knives of his mower lying across his waist, his team, instead of running away, just kicked until he was released.

A forward motion of the horses would have sent the sharp knives sawing through his body. The trouble started when the team stirred up a nest of bumble bees in the second cutting. These stung the horses and the kicking that ensued broke the pole of the mower, tipping Curry forward. A couple of steps forward by the horses brought the knives directly across Curry's body.

At this point frenzied calls of "whoa" stopped the forward motion of the team, which continued to kick but took no steps ahead until help arrived. Curry came through the experience with minor bruises.

MURDERER GIVES UP TO A WOMAN

Novelty Too Great Lure for Slayer of Five.

Texarkana, Ark.—The novelty of surrendering to a woman sheriff has led Carl Kennie Wagner, twenty-three, again into the hands of the law after five killings and an escape from the electric chair.

Wagner explained his surrender on this basis after giving up to Sheriff Lillie Barber following the shooting of Sam, Will and Bob Carper. Sam and Will Carper died.

The novelty and honor of surrendering to a woman sheriff appealed to him, he said, and then, too, he declared he had nothing to fear from his last two killings and he was "tired of dodging people."

The Carper brothers were shot in a fight on a farm near here, Wagner stating he had to shoot to save his own life. Only darkness saved Bob from the fate of his brothers, Wagner said.

Wagner admitted in jail that he had accounted for five men in gun fights in addition to wounding two others. He formerly was an expert rifle and pistol performer with a circus.

He admitted being wanted at Blountsville, Tenn., where he escaped from jail while his appeal from a death sentence for killing two Tennessee officers was pending.

Wire Tells Death of Sisters to Telegrapher

New York.—C. T. Wright, telegraph operator on the long western trunk wire of the Associated Press, "broke" for the first time in many a long trick when the emotionless Morse code ticked off the story of a truck wreck at Gastonia, N. C.

"Five girls killed," the item read—just another of the so-common holiday fatalities—a picnic party or a family outing, a grade crossing, a speeding express.

"The dead are Bertha Wright, sixteen, her sister, Laura, twenty," the copy read and then a break and the sign: "More" as another point interrupted with what seemed to the control editor a more weighty item.

Telegrapher Wright took the intervening item and then completed that from Gastonia.

"They are my sisters," he explained, "one of them lived with me most of the time since mother died. I'm afraid I'll have to ask for relief so that I can go there."

"Naw, I Wasn't Scared," Says Boy Lost in Forest

Portland, Ore.—He always was a "tough little nut," his father says. So Jackie Strong, seven years old, never whimpered when he was lost for three days and two nights in a forest near his home.

Jackie thought this idea of living in the wilds was great stuff. That's why he ran away from home. Searching parties found him seated on a rock grinning at their efforts to find him.

Asked how he managed to eat, Jackie said:

"Oh, I ate three raw fish and a lot o' huckleberries."

Marble Mausoleum Holds Remains of Pet Poodle

San Francisco—After lying in state for ninety-six hours in a silk-lined coffin, Phil, French poodle dog, thirteen years of age, owned by Mrs. E. T. Perry, millionaire resident of Atherton, has been placed in a magnificent marble mausoleum on the Perry estate.

After Phil died, his mistress and several friends held an old-fashioned wake. The dog's head reposed on an embroidered pillow and, as the watchers sat throughout the long night, Mrs. Perry told of Phil's achievements and the many blue ribbons awarded him at shows throughout the country.

Die in Pact

Philadelphia—The body of a woman, found with that of Emanuel Valencio in a gas-filled room in what the police said was a suicide pact, was not that of his wife.

Scissors in Hand

Do you read newspapers and magazine advertising columns with a pair of scissors in your hand or at your elbow? I do, and it is one of the most convenient and pleasant habits I have.

We all have the experience of running across a clever bit of verse appropriate for a friend or a cartoon that we would like to show Friend Husband, or an advertisement for some household necessity, or perhaps a notice of some new book that sounds interesting. As we read, we think vaguely that we must cut out that poem or that cartoon, or save that recipe or that mail-order advertisement, or clip the notice of the new book. But the scissors are not handy, and the paper or magazine is laid down, and by the next day we cannot remember just where we saw the thing anyhow. We glance back through the morning and evening papers, and thumb the magazines again impatiently, and perhaps we find what we are seeking, perhaps we don't.

I've formed the habit now of reading, scissors in hand. When I find an advertisement, an amusing anecdote, a pithy cartoon, a new recipe or household hint that interests me, I clip it out then and there and tuck it in a small letter-rack on my desk for future attention. The recipes go to my indexed box, after being tried out; the anecdotes or verses are slipped into letters for shut-in friends, perhaps, or for correspondents to

whom they especially apply. The advertisements are answered. By the way, I did a large part of my Christmas shopping by mail this last season. The magazines brim with novel and attractive suggestions for gifts that will be sent by mail.

I clip reviews of new plays, special articles that I want to read more slowly and carefully, notices of special sales at certain shops. All these are slipped in my letter-rack or tucked under my blotter, and when I want them I know where to lay my hand on them; whereas I used to say frequently, "Now where in the world did I see that notice about slip covers?" or "I wish I had saved that article about Russian dancing to send to Alicia." To read scissors in hand is to save what we read.

Cultivating a Fad

"What did you give Sue for her birthday?" inquired a visiting cousin.

"Oh, a teapot, of course. She has a fad for collecting, you know. She has the most charming ones—rare things that all her friends send her, and she keeps them in a special cupboard built into a window where the light shines on them and through some of them. I gave her an exquisite little teapot that I had Charlie bring me from China on his trip last year. She is so easy to get gifts for, as she has two or three collections to add to. She never gets the nondescript handkerchiefs, sachets, and gift-shop doodads that the rest of us do."

The woman with a fad or two is not only a delight to herself, since she becomes absorbed and interested in some one activity, but she is a boon to her friends as well. I know a matron whose garden is her chief joy in life. She has a collection of garden books to which her friends are always adding, and which includes some of the magnificently illustrated de luxe volumes that most of us merely look through in the shops. To see one of these books is to think of her and send it to her, if possible.

Cultivating a favorite color gives one individuality and helps one's friends to choose acceptable gifts. A lavender scheme of summer-house decoration and personal clothing brings one woman of my acquaintance the loveliest of lingerie, negligees, candlesticks, semi-precious stones, and so on—all in the lavender tones. A flair for peasant things—embroidered bedspreads, Czechoslovakian chests, or china, odd-painted wooden pitchers or bowls, draws these things to one like a magnet.

A young girl I know is immensely fond of apples, and says so. What a distinctive birthday she has! A box of apples from the Far West; a decorative bowl of apples for her room at school; an occasional jar of fresh-made apple sauce from a doting aunt; a set of table linen amusingly decorated with apples—apple jelly, apple butter—a card with "Appley New Year" on it! One is never at a loss to know what to give her.

Real Apple Pie Feast for Gods

The really valuable apple pie is to be found not so much in restaurants as in rural homes. There the pie is carefully compounded according to ancient and approved rules, and after having been baked, a delicate operation lifts the upper crust in order that the steaming apple slices underneath may be made more enticing by the addition of butter and sugar, both being melted by the heat. An ancient practice, now often neglected, added nutmeg as well.

But, alas! Satan often contrives to mar perfection, and so it comes about that in due time pies made of dried apples appear, though this evil, thanks to the canneries, is now diminishing. Evaporated apples form inadequate material for pies, but they are far superior to the farm-dried product, regarding which the less said the better. The apples, let us hope, will reach the piecrust in their natural state, in which event Thanksgiving day should be marked by more than the normal volume of thankfulness.

Cuticura Comforts Baby's Skin

When red, rough and itching, by hot baths of Cuticura Soap and touches of Cuticura Ointment. Also make use now and then of that exquisitely scented dusting powder, Cuticura Talcum, one of the indispensable Cuticura Toilet Trio.—Advertisement.

Break Cake on Bride's Head

It was the custom of the Romans, 2,000 years ago, to break the wedding cake over the head of the bride as she entered her new home. The breaking of the cake was part of a solemn ceremony, and was said to be peculiarly impressive. A similar custom prevails in some sections of Scotland, where a bannock is broken above the head of the young wife as she, for the first time, enters her new home.

DEMAND "BAYER" ASPIRIN

Aspirin Marked With "Bayer Cross" Has Been Proved Safe by Millions.

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 26 years.

Say "Bayer" when you buy Aspirin. Imitations may prove dangerous.—Adv.

Simple Method

Eddie—Say, how do you expect your girl to get that letter when you don't put any address on it?

Arch—She's a clerk in the dead-letter office.

WRIGLEY'S

WRIGLEY'S satisfies the desire for sweets, it helps make strong healthy teeth, removes particles of food from teeth crevices, and aids digestion. So it is a wonderful help to health.

Turn on the Cold

Cold distributed on the same general principle as heat is an innovation of the newer apartment dwellings in some of the large cities. Instead of installing bulky machinery in individual apartments for iceless refrigeration purposes, one central machine is used in the basement, just as one furnace or boiler is used. From this central plant the individual apartment housewife can control the cold in her iceless refrigerator, turning it on or off as simply as she regulates a radiator.

Might Help

Agent—No matter what kind of writing you do, this fountain pen is just the thing for you.

Jones—That so? I'm a sky-writer.

WORLD-WIDE sales of quality cars and trucks

General Motors cars and trucks are sold and serviced in 104 countries. The export shipments in 1925 amounted to 119,632 motor vehicles; and the overseas assembly plants and warehouses of General Motors now number 19. This vigorous development of the world-wide market for a complete line of quality cars is important to the car buyer. It is not only a contribution to international prosperity and progress, but it also helps to maintain the *continuous* production program at the factories, on which low prices depend.

Successful

"How did your wife come out with her job of painting the car?" we interestedly inquired.

"Fine!" enthusiastically replied the husband of the paint slinger. "It was a complete success! Why, the old boat doesn't look any worse now than it did before she began."—Kansas City Times.

A Word With the Old Folks

Elderly People Are Learning Importance of Good Elimination.

IN the later years of life there is apt to be a slowing up of the bodily functions. Good elimination, however, is just as essential to the old as to the young. Many old folks have learned the value of *Doan's Pills* when a stimulant diuretic to the kidneys is required. Scanty or burning passages of kidney secretions are often signs of improper kidney function. In most every community are scores of users and endorsers who acclaim the merit of *Doan's*. *Ask your neighbor!*

Tanlac Relieves Many Ills

Health Ravaged by Bad Heart, Nervousness and Sour Stomach, Mrs. McLean Manages to Avert Disaster. Health and Strength Are Restored. Gains 38 Pounds.

"Take Tanlac—that is my advice to everybody, and it is from one who has tried it," says Mrs. Elisabeth McLean, 4171 Lincoln Ave., Oakland, Cal.

"Four or five years ago I first used it, and ever since then have depended on it. Then I was afflicted generally—had to build up or give up entirely. My stomach was in an awful state, my heart bothered me and I could not eat. I was so weak and nervous, I kept losing weight and strength, my health seemed wrecked, nothing helped me.

"But six or eight bottles of Tanlac put me back in splendid condition. My stomach troubles gave way; I gained perfect digestion and with it an appetite hard to satisfy. I increased in weight from 120 to 158 pounds. Tanlac is my formula for good health. It is and always will be the best."

Tanlac made of roots, barks and herbs, helps build up scrawny, weak bodies, drive out causes of suffering and give the body good health.

Don't suffer pain needlessly. Learn from others. Take wonderful Tanlac. At your druggist's.

I would be true, for there are those
who trust me;
I would be pure, for there are
those who care.
I would be strong, for there is
much to suffer;
I would be brave, for there is
much to dare.
—H. A. Walters.

WHEN ENTERTAINING FRIENDS

We all wish to extend courtesies to our friends, and when we entertain them it is a pleasure to serve food that is pleasing, and if possible, unusual. Those who are deprived of home cooking enjoy best of all a good meal of substantial, well prepared food. The wise hostess fits the dinner to suit the needs and tastes of her guests.

There is no main dish more appetizing than a good ham well baked, served with creamed potatoes and glazed sweet potatoes, with a simple salad of some seasonable combination with the following dessert:

Hamburg Cream With Fruit Juice.—Put a cupful of raspberry and currant juice into a double boiler over the fire. Beat the yolks of nine eggs, add a cupful of sugar and beat again; add the juice scalding hot to the eggs and sugar, very slowly; return to the boiler to cook until thick. Remove from the heat and fold in the stiffly beaten whites of nine eggs. Serve chilled, in sherbet glasses with macaroons.

Frozen Boston Pudding.—Grate half a loaf of Boston brown bread that is at least a day old, pour over it a pint of hot cream, allowing it to stand until cold. Prepare a rich boiled custard by scalding a pint of milk and adding three well-beaten eggs and two tablespoonfuls of sugar. Cook until the custard coats the spoon. Cool, add the bread crumbs and half a pint of sweetened whipped cream. Flavor with a few drops of almond extract and turn at once into the freezer. When frozen, remove the cream to a flat pudding dish, cover with macaroon crumbs and bury in ice and salt until serving time.

Ginger Cobbler.—Cut into dice one pared cucumber; slice two oranges, three lemons, sprinkle with powdered sugar, add a cupful of ginger sirup and put on ice for two hours. Add two quarts of ginger ale, a cupful of sugar sirup and pour over a block of ice in a punch bowl. Garnish with raspberries or other bright fruit.

Bananas dipped into salad dressing then rolled in chopped nuts and served with mayonnaise, on lettuce, are liked.

Seasonable Dishes.

Bananas are to be found in almost any market at any season of the year.

Baked Bananas.—Remove the skins from five bananas, cut in halves lengthwise, and put into a shallow pan. Melt two tablespoonfuls of butter, add a third of a cupful of sugar and two tablespoonfuls of lemon juice. Baste the bananas with one-half the mixture. Bake 20 minutes in a slow oven, basting during the baking with the remainder of the mixture.

Fillets of Beef With Bananas.—Cook the fillets cut one and one-quarter inch thick and arrange on a platter, pouring over them the liquor from the pan. Saute quarters of bananas in a small amount of butter until cooked and place a piece of banana on each fillet when serving.

Banana Sponge.—Line a mold dipped in water with crosswise sections of banana and fill with the following mixture: Mix a half-cupful of corn starch, one-fourth of a cupful of sugar, and a fourth teaspoonful of salt; add gradually a fourth of a cupful of milk. Add a quart of scalded milk, stirring and cooking for eight minutes, or cook in a double boiler for 15 minutes; add a teaspoonful of vanilla, and the whites of three eggs beaten stiff. Chill thoroughly and remove from the mold. Serve with a custard made from the yolks of the eggs.

Banana Salads.—Mix finely cut bananas with canned or fresh cooked green peas and French dressing. Serve in the banana skins on lettuce.

Canterbury Chicken.—Cook three and one-half tablespoonfuls of butter with one of finely chopped onion, until yellow, stirring to prevent burning. Add one tablespoonful of cornstarch and one and one-half cupfuls of chicken stock. Bring to the boiling point, add one-half tablespoonful of lemon juice, three-fourths of a teaspoonful of salt, a few dashes of paprika, one-half cupful of celery cut into small pieces and one and one-half cupfuls of chopped chicken. Serve very hot, garnish with toast points and parsley.

Prune Toast.—Take one cupful each of prune juice and stoned stewed prunes, the juice of two oranges, two tablespoonfuls of cornstarch. Heat the prune juice, add the prunes and orange juice, mix the cornstarch to a paste with a little of the juice and add to the mixture. Cook over water until well cooked and thickened. Pour over well-buttered slices of toast and serve at once.

Mint may be steeped and strained and kept to add to drinks of lemonade.

Nellie Maxwell

"FIRST PEOPLE" TURNED TO STONE

Legend of Petrified Indians Is Traced.

Washington.—The progenitors of the Mission Indians of California, the "first people," as they are called, were petrified into rock and can still be seen at the ruins of the old village sites. So say the legends gathered among the California Indians by J. P. Harrington of the bureau of ethnology, Smithsonian institution. Mr. Harrington devoted a year of intensive research, rescuing what can still be learned of the vanished culture of the Mission Indians.

Petrification seems to have been a common conception among the California tribesmen. At San Marcos Mr. Harrington found bowlders on a hillside which are the warriors of a mythic battle. Some have the blood from wounds running down their sides seen as stains on the rock. Mr. Harrington found also a curious medicine rock the size of a man standing erect. It is surrounded at the present time by a grove of cactus which keeps the curious at a respectful distance.

The wanderings of the "first people" over the earth while it was still soft and muddy in its newness are also recorded as spirit footprints on the rocks. These Mr. Harrington found at several places and photographed.

"Medicine" rocks with a practical aspect were discovered at Rincon. They are two tall bowlders standing some six feet apart. To have good luck in hunting, which required that one could jump successfully among the rocks in the mountains, it was the custom for Indian boys to spring from one to the other of these bowlders.

TINY THINGS COUNT

Here are half a dozen inventions that you can hold on your hand, and each one of them has made a fortune for its creator. Patent office records show that simple inventions have usually been the most profitable.

U. S. Servant Shares in $35,000,000 Estate

San Francisco, Cal.—Albert Bertie, a butler here, told newspapers he had received notification that he was one of the heirs to a $35,000,000 English estate left by the late duke of Argyll.

According to the servant's story, his father, the late John Brodie Bertie, once a wealthy manufacturer of steam turbines, was the first claimant to the estate, but allowed his claim to lapse. The elder Bertie later lost his fortune, and his sons, Albert and Norman Bertie, were without funds to bring a claim against the estate left by the duke.

The house of chancery and records in London recently reopened the estate voluntarily, Bertie says, and he plans to leave for England in three months to be present at the distribution of the estate.

Uneasy Bed

Pittsburgh, Pa.—James Campbell went to sleep in a newly laid cement sidewalk and police were forced to cut off part of his hair and clothing before he could be freed.

This Family Is Tiny League of Nations

London.—Six destitute orphans, each of a different nationality, were recently adopted by a wealthy English merchant and his wife, who were childless. They decided to rear them as their own and their family is now a little "league of nations." The nationalities of the boys are as follows: Johnnie, English; Pierre, French; Camillo, Italian; Carlos, Spanish, Ignace, Polish, and Jan, Swedish. The youngest of the boys is only six months old and the eldest six years. All boys have been naturalized and are now British subjects. The family is said to be wonderfully happy and the foster father believes this experiment of a "league of nations" will be a great success.

BREST-LITOVSK MAY BE RECONSTRUCTED

American Funds Offered to Rebuild Polish City.

Washington.—American funds have been offered for the restoration of another war-ravaged European city—Brest-Litovsk, Poland, according to a news report from Warsaw.

Brest-Litovsk, which is famous for the separate treaty which representatives of Soviet Russia and Germany signed there, today consists of a fine railroad station and practically nothing more. Buildings which housed 50,000 people were laid waste and the large refugee population lives principally in caves and huts.

"Before the war Brest-Litovsk was one of Russia's most important trading centers and fortresses on her eastern borders," says a bulletin of the National Geographic society from its headquarters in Washington.

Center of Communication Web.

"Complete restoration of Brest-Litovsk would mean recreating a city busy with buying, selling, carrying and transferring the products of a large agricultural region. Railways from Odessa, Kiev, Moscow, Warsaw, Vilna and East Prussia intersect at the lonesome new railroad station. But Brest-Litovsk is more than a rail center. It lies upon the inland waterway from the Baltic to the Black sea. A canal east of the city connects the Mukhovets river and the Pripet river, which are, respectively, fingertips of waterway arms reaching from the north and south toward each other. Thus the city is served by a well-nigh perfect system of communication, extending in all directions.

"Brest-Litovsk lies 100 miles due east of Warsaw. Normally half its population was of Jewish blood, and it long has been a Jewish stronghold. It never developed an industry, but depended instead upon commerce. During the Sixteenth century the synagogue of the city was regarded as the first in Europe.

"Grains, hides, soap, wheat and timber were the staples of its extensive trade. The lumber in which it dealt was floated in great rafts down to Danzig. Flax, some of which went to Ireland and Belgium to make Irish and Flemish linen, was extensively grown in the country surrounding the town and formed another important article of its trade.

"The familiar geographic reason for the existence of a town, namely two rivers meeting, gives Brest-Litovsk its excuse for being. The navigable Bug and Mukhovets rivers join and at the point of confluence once stood the city fortress. Older fortifications were east of the city and covered four square miles. The defenses were the pride of Russia.

"But the World war showed what history had been reporting for years; that Brest-Litovsk was far from invulnerable. It was first mentioned in ancient documents on the occasion of its capture by a Polish monarch in 1020. Next Casmir the Just of Poland built a tight castle. Princes of Galicia, Vlohynia, Lithuania, grand masters of the Teutonic Knights, Tatar chieftains and kings of Poland held and stormed the city in turns, and going out from it gathered spoil from the countryside.

Climax of Russian Tragedy.

"All of Brest-Litovsk history, however, records no such high moment as it experienced late in 1917. Things looked black for the allies. Russia, which had been holding Germany on the east, had collapsed internally under the pressure of war. Kerensky, who still espoused the allied cause, was soon displaced by the Soviet regime. Germany had driven deep into Russian territory. With this setting the last act of the Russian tragedy took place in Brest-Litovsk, which by that time had degenerated into a war camp and nothing more.

"At the headquarters of Prince Leopold of Bavaria, Soviet representatives signed a separate peace with Germany which put the entire burden of carrying on the war on England, France, the United States, Italy and their allies."

Sparrow Finds a Way to Get Meal on Auto

Berkeley, Calif.—The irrepressible English sparrow has learned to make the automobile contribute to its bill of fare.

According to ornithologists' observations in such widely separated regions as Illinois and California the resourceful birds have been making a practice of collecting toasted grasshoppers and other insects that have become wedged in the fronts of automobile radiators. In central California large numbers of sparrows were observed "working" the front of car after car parked along the streets, says H. S. Swarth of the department of zoology of the University of California.

In spite of concerted drives to head it off, the indomitable sparrow's march across the continent has proceeded unimpeded and the rowdy ragamuffin has ingeniously turned to its own advantage the machine that, by eliminating the horse from the streets, had deprived him of an important source of food.

Claims Sea Record

Swansea, Wales.—Miss Anna Dale, an immigration inspector, claims the marine travel record of all time for passengers with a total of 1,500,000 miles.

FIND REMAINS OF ANCIENT AMERICAN

Believed to Be Ancestor of Indian.

Galena, Ill.—The skeleton of a prehistoric American, an ancestor of the Indians, has been uncovered in a mound near here, by a University of Chicago anthropological expedition.

The bones, those of a man about thirty, were in a flexed position, the arms folded across the breast and the knees drawn up in closest approach to the chin. The find was made about three feet below the surface, along a 1,100-foot ridge of mound on a farm, where operations have been carried on for two weeks. The scientists are under the direction of Prof. Fay Cooper-Cole. Near by were portions of two other skeletons, while bundles of bones also have been found, those of a woman, a child and a dog.

It was thought at first that the ridge might have been a fortification, after the forts of ancient type, but investigation revealed it as a burial place. Below the ridge, in a little oak-shaded plateau, was believed to have been the site of the primitive community.

Illinois, according to Prof. Cole, is the key state, anthropologically speaking, in the picture of prehistoric America which science is trying to depict. Efforts are being made to find out what sort of people produced the Indian tribes that the white man found in this locality, and whether the civilization is linked with the great mounds of Ohio and lower Mississippi.

A large collection of relics already has been gathered in the Galena area by amateurs, and now it is planned to survey the district and open the mounds thoroughly. In one locality alone there are 142 mounds, all untouched. Others have been looted. Articles found included arrow heads, hammer heads, pottery, copper beads, bear-tooth necklaces, pipes and copper ornaments.

Skeletons uncovered will be inclosed in plaster and sent to the university laboratory for measuring, and then will go to the Feld museum and other institutions. The type of civilization revealed is not high in the opinion of Professor Cole, who said that no writing has been uncovered in mounds in any part of the United States.

Acoustics Expert Tells What Makes Good Hall

Urbana, Ill.—The ideal concert hall, to assure the greatest comfort to hearers and players, should have sound-absorbing walls around the audience, but should be left bare and reverberant at the musicians' end.

Prof. F. R. Watson of the University of Illinois, an authority on acoustics, has sought to explain by scientific experiment why no one can really enjoy music in the rooms where the musicians find conditions best for playing. In a forthcoming issue of Science he states that the circumstances in the same room must be quite different for playing and listening. By shifting the sound-absorbing materials that take up the excess reverberations, from one part of a room to the other, he was able to produce the acoustically perfect chamber that satisfied both audience and performers.

A clear space around the stage allows easy generation of sounds while the deadened walls in the other end reduced their intensity and reverberation to the greater comfort and pleasure of the listeners.

Ape Descended From Man, Says German Savant

Berlin.—The ape is descended from man and not man from the ape, according to Prof. Max Westenhofer, custodian of the Pathological museum of the Berlin university. He points out that chimpanzee cubs resemble human beings much more than do their parents. He says that certain inner organs give evidence that man's ancestors lived for a time in water. These peculiar characteristics are missing in apes, which, he declares, "shows that the ape represents the subsequent development and proves that man is the older form of mammal." Professor Westenhofer elucidated this theory before the anthropological congress now in session at Salzburg.

Danger in Bobs

Philadelphia.—Women are likely to be bald because of bobs, in the opinion of one hairdresser at a convention. He says bobs have led to the fad of tight hats, which cause the hair to fall out.

Chicks Grow Faster by Ultra-Violet Rays

Newport, Eng.—Young chicks have been made to grow twice as fast by use of electricity, says Prof. Boriases Matthews, a poultry expert. The young birds were treated for nine weks with ultra-violet rays.

Professor Matthews advises poultry farmers either to give chickens electrically made ozone as provided in London underground railways or to bathe them with electricity radiated from electric wires over their perches at night. He contends the yield in eggs would be increased nearly 50 per cent.

HIGHER THAN WOOLWORTH BUILDING

Year's Sales of Lydia E. Pinkham's Vegetable Compound

MRS. ED. DAUGHERTY
1308 ORCHARD AVENUE, MUSCATINE, IOWA

The Woolworth Building in New York City, which towers 792 feet above the street, is the highest building in the United States.

If all the bottles of Lydia E. Pinkham's Vegetable Compound sold in 1925 could be placed end to end, they would make a column as high as the Woolworth Building with enough left over to extend from Lynn, Massachusetts to Cleveland, Ohio.

In many little villages as in many thriving cities along the route, who are glad to tell others about Lydia E. Pinkham's Vegetable Compound.

In a recent letter, Mrs. Daugherty says, "I was ill for four months before I took your medicine. I found one of your books at my front door and read it. It seemed to fit my case, so I began taking Lydia E. Pinkham's Vegetable Compound, and after I took the third bottle, I found relief. I am on my eleventh bottle and I don't have that trouble any more, and feel like a different woman. I recommend the Vegetable Compound to every one I see who has trouble like mine. I am willing to answer any letters from women asking about the Vegetable Compound."—Mrs. Ed. Daugherty, 1308 Orchard Avenue, Muscatine, Iowa.

Mrs. Carr Also Helped

Muncie, Indiana.—"I could not get around to do my work. I took treatments and they did me no good. I had always heard of Lydia E. Pinkham's medicine and I thought it would be like all the others, but I found out after I took half a bottle, as I have proved it wonderful. I am taking it yet and I can do all my work. I am feeling fine now, and it is your good medicines that have done it. I tell every woman of the good I get from taking the Vegetable Compound and from using the Sanative Wash."—Mrs. P. W. Carr, 721 West Powers St., Muncie, Indiana.

When Cantaloupe Laughs

A scientist says that vegetables have thoughts, feelings and emotions similar to those of human beings. If that is so, how the average cantaloupe must enjoy the look of disappointment on the face of the person who has just cut it open.—Boston Transcript.

To encourage the rubber industry, the Philippine islands furnish seed to growers at cost.

Language in Ireland

The native Irish speak in English or the Irish language. The Irish is a Celtic language, which is now being used by a greater percentage of the people of Ireland. The decline in use of Irish began in the Eighteenth century and the language was gradually superseded by English until 1901, when only 20,953, or 4.5 per cent, of the people could speak Irish. The number of pupils in schools learning Irish is still on the increase.

Children Cry for

Fletcher's CASTORIA

MOTHER:— Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of Chas. H. Fletcher
Proven directions on each package. Physicians everywhere recommend it.

Why Is It—

That the evening you planned for a quiet one is usually a rip snorter?—that the day you go to the country it always rains?—that all plans made between 1 and 6 a. m. never materialize?—that every time you are taken to the theater you have seen the play before?—that after you have given the waiter the order, you always discover on the menu a far more appetizing dish?—that yesterday's newspaper seems ages old?—that you can never remember the singularly brilliant thought that struck you the other morning in the bath?—that whenever you are in a hurry every thoroughfare turns out to be a one-way street of the opposite direction?—that you can never tell what a woman is going to do next?—Kansas City Star.

Poetic Intoxicant

A new intoxicant has appeared in Japan. In the precincts of a shrine at Kameido in Japan the other day a policeman on patrol discovered what he took to be a corpse. He telephoned to the village office for a coffin, which was at once sent, and the body put in. On the way to the village office, however, the corpse in the coffin revived and began to sing and dance, to the alarm of the bearers. It was later ascertained that he was a young man, aged twenty-three, who had been made intoxicated by viewing the cherry blossoms.

A machine to measure the exact color of different kinds of hay has been invented to help local inspectors in the grading of hay.

Genuine BAYER ASPIRIN

SAY "BAYER ASPIRIN" and INSIST!

Proved safe by millions and prescribed by physicians for

Colds	Headache	Neuritis	Lumbago
Pain	Neuralgia	Toothache	Rheumatism

DOES NOT AFFECT THE HEART

Safe — Accept only "Bayer" package which contains proven directions.
Handy "Bayer" boxes of 12 tablets
Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

"Talk Is Cheap!"

"TALK is cheap—but it takes money to buy a farm!" Many a schoolyard argument of boyhood days has been ended with this homely bit of philosophy.

For the American telephone user, talk is truly cheap—cheaper than anywhere else in the world. But it takes money to keep his telephone service cheap and to make it ever and ever cheaper. The Bell System is devoting millions of dollars to research in order to discover economies that will partially offset the rising costs of labor and materials. It is spending nearly three-quarters of a million dollars a day for new plant, every dollar of which extends the scope of every telephone and makes every subscriber's service more valuable.

The savings of telephone users, invested in telephone securities, have helped to make the Bell System's nation-wide service the most economical, as well as the most efficient and most extensive, telephone service in the world.

Search for Treasure Concealed by Bandits

What purports to be a thoroughly authenticated copy of the confession of Pedro Navarro, a bandit chief who operated in northern Mexico fifty to sixty years ago, forms the basis for a treasure hunt which is now in progress in the Caballo mountains.

The original document of this confession is among the archives of St. Augustine church in Mexico City. It contains a detailed recital of various exploits of the band of brigands, led by Navarro, itemizing the booty obtained from altars of churches and holdups upon highways and byways. The aggregate amount of these ill-gotten gains is placed at approximately $17,000,000.

An expedition, outfitted by C. H. Taggert and Clyde Welch of Los Angeles, Calif., and including seven United States soldiers from Fort Bliss, is now making search for the fabulous treasure. The soldiers are used to guard the fortune should it be found.

An excavation is being made at a point in the mountains described in the ancient document left by Navarro. It is related that at a certain depth a cavern will be found and in this cave the glittering store of gold, silver and precious stones will be found.

"Isn't it nice to find that Tom is engaged to both of us! Now we can be so chummy, can't we?"

Luther Burbank Had the Secret

If you wish to live long and be healthy and happy, make a garden the plaything of your advancing age. You will soon learn to enjoy it as a child enjoys its new toys; your boredom will vanish; life in the open will paint your cheeks red, give you a good appetite, and once more open your clogged senses to the beauties and enchantment of nature which you knew as a child, but had forgotten during the years when you were shoveling superfluous dollars into your vaults. Start a garden next spring, and in a few weeks, you will have an interest in it which will soon be a mania—a passion that will keep you alive, busy, absorbed, enchanted. It will add twenty years to your life.—Henry Finck.

Water and Power Act

The half billion dollar Water and Power Act measure is on the ballot again, as it was in 1922 and 1924. It was defeated in 1922 by a majority of 354,000 and in 1924 by a majority of 431,000.

It is predicted that the proposition will again be overwhelmingly defeated November 2, and that the coming expression at the polls will be the final death jolt; that the promoters will lose heart and quit.

There is nothing new in the Power Act to change the sentiment of the voter, and the original arguments fail to appeal. The average voter is looking for something new to enthuse and thrill.

The Power Act is a dead issue until conditions change and the plan has a more favorable field to work in and the promoters can substitute something different from initiative measure No. 18 on the November ballot.

There Is a Difference

"That public corporations should be under public control is no doubt absolutely necessary. Human selfishness does not disappear because men are combined together in a corporation, but there is a vast difference between government supervision and government ownership and management, and in that difference lies the reason why the former has proven itself a wise and beneficial policy and the latter more or less of a failure."—Pacific Underwriter and Banker.

WHY SHE CHANGED

He—But you said you were set on marrying me.

She—I was until dad sat on it too.

Admitted a Vacuum

A plaintiff in a personal injury case heard recently before a jury in Superior court, Room 5, over which Judge T. J. Moll presides, was testifying about the injuries he had received. He said he had an X-ray photograph taken of his head.

"What did that picture disclose?" asked at attorney for the defense.

"It showed there was nothing there," the plaintiff naively replied.

The jury after being out ten hours and a half returned a verdict for the defendant.—Indianapolis News.

THE BULL'S EYE

A flashy young maiden Miss Yewell,
Wore a stunning red gown trimmed with tulle,
Men's gaze she'd attract
She was certain of that
But not once did she think of a bull.

Canada's Export Trade

Canada ranks second among the countries of the world in value of exports per capita.
